## Description

Norden on Stone is Greenville, South Carolina's finest Scandinavian inspired townhome community. A collaborative effort between local architects, BLOM Design Studio, and luxury homebuilder Cobblestone Homes, this innovative community offers a unique solution to urban living. The exteriors at Norden were designed to highlight the intersection between the quiet North Main neighborhood and the more urban setting to the south of Stone. The traditional shape language, mixed with striking window patterns and textured wood cladding provide timeless styling and visual interest from every angle. The rooftops at Norden were designed to enhance privacy between units while maximizing views of Downtown and seamless integration of indoor and outdoor rooftop spaces. Nothing was overlooked with the interior designs at Norden. Channeling Scandinavian simplicity, urban efficiency, and southern charm, the interior spaces are designed to maximize the efficiency of the space, giving multiple rooms for entertaining, private bedroom suites, and open concept main floor living. All while ensuring that every angle of the home is just as breathtaking as the last.
