Description

Have you always wanted to get in on the ground floor of new development? This home area is on the ground floor of a lot of new development. Location, location, and great location... you're right in the middle. You want to be close to downtown Greenville?? You want to see new homes, new condos, and more new being done all around this area, you've come to the right place for sure. The great thing about this home it's right in the middle of all the new builds. This area is going to keep on going up and up so be one of the first to buy now!!! The land maybe the greatest purchase you have ever made!! You want a home with character and style?? When you drive up your going to notice a cute bungalow home that has a "come on & sit down on the front porch" feel calling. You can rest and relax and enjoy the evening. When you walk in you're going to notice original hardwood floors that can be refinished to your taste and desire. The rooms are big enough to have the size of furniture that you want, not what might fit. There is a fireplace in the living area (no warranty, never used). The primary bedroom is located in the front of the home. Large enough for a king-size bedroom suite and then still have walk around space. The home has new vinyl tilt-in windows throughout the home. One of the best features is new laminated flooring in several rooms. Not only is it stylish but it's very durable too. With summer on its way, one of the best features is the large fenced-in back yard. You're going to love this for summer fun and having friends over! Can't you just see yourself with that master grill?? Who wants to have a barbecue? Don't miss your opportunity to call this place home!
