Description

Welcome to 400 Longview. This beautifully updated 4-bedroom, 2 ½ bathroom home offers the perfect blend of charm, functionality, and convenience and has been well-maintained and beloved by the same family for years. Full of character and modern updates, this home offers almost 3,800 square feet on a landscaped 1.41-acre lot. The flexible semi-open floor plan ensures a natural flow between living spaces while still maintaining defined areas for relaxing and entertaining. In addition to the bedrooms and bathrooms, the floorplan includes a welcoming stone floor foyer, a formal living and dining room, a kitchen with refurbished cabinets, granite countertops, and a gas cooktop, and a new double wall oven, a family den with a gas logged fireplace, a home office and a large family room with a pool table. Beautiful hardwood floors are throughout the home, with the exception of carpet in the large family room, tile in the two full bathrooms and the stone floor foyer. The primary suite has two (2) walk in closets and the bathroom features a quartz dual sink counter and a custom walk-in tile and glass shower. The hall bathroom has a quartz counter and a tub/shower with glass door and siding. French doors lead to a spacious back patio ready and waiting for spring and summer BBQs. The crawl space under the house is fully encapsulated with dehumidifier and sump pump system. Another huge feature is a four (4) tandem car garage under the home with plenty of room for parking and which can also be used for storage or a workshop area. Take advantage of this unique opportunity and come see this beautiful home today while it is still available!
